EDUCATION

Postgraduate in Cybersecurity & Mobile Application Development

2022 - 2024

Centennial College, Toronto, Canada

- Studied mobile frameworks (SwiftUI, Kotlin, React Native, Flutter), gained experience with cloud platforms (Docker, AWS, Azure), and applied Linux/Kali for ethical hacking and networking.

Bachelor's (Honors) in Computing

2018 - 2021

Islington College, Kathmandu, Nepal

- Focused on project management, software development (**Java, Python, C, C#**), machine learning, database algorithms (Python, Anaconda, Jupyter), with strong emphasis on teamwork and time management.

PROFESSIONAL EXPERIENCE

Software Developer

2023 - Present

Two Row | Toronto, Canada

Worked as a solo developer managing different projects and deploying them on respective ends. Collaborated with clients and teams, adapting to evolving requirements, demonstrating strong communication, problem-solving, and independent learning skills.

- Full-stack mobile and web development using **Flutter**, Swift, Kotlin, Node.js, Next.js, Vercel, delivering cross-platform apps.
- Built and maintained RESTful APIs, integrated **Firebase, SQLite**, and implemented **offline storage** for reliable data access.
- Designed and implemented secure data protection using industry-standard encryption across multiple mobile applications.
- Leveraged geolocation, Google Maps, and **app permissions**, optimizing real-time location-based features.
- Applied algorithms in **Node.js** for large data compilation and ensured clean, maintainable code using **MVVM** design patterns.
- Deployed apps to **App Store** and **Google Play**, pushing updates via **Shorebird** and automated **CI/CD** pipelines.
- Implemented **UI/UX** improvements, notifications, and interactive features to enhance user engagement and retention.

Software Developer

2020 - 2023

Nepal

*Started as an intern and steadily advanced to lead a team of 4 developers over 3 years. Gained strong hands-on experience in mobile app development, backend API design, and app deployment. Built multiple apps from the ground up using Flutter, **Django REST**, and Node.js, and learned to publish and maintain apps on both the App Store and Google Play.*

- Advanced from intern to **team lead** managing 4 developers, delivering multiple cross-platform apps using Flutter, Django REST, Node.js, Swift, Kotlin.
- Designed and deployed** mobile apps and backend APIs, integrating Firebase, SQL, **offline storage**, and **Google Maps** geolocation services.
- Optimized app performance with **caching, scalable algorithms**, and data processing, improving speed by 70% and retention by 25%.
- Led UI/UX design collaborations, ensuring practical design solutions and smooth workflows.
- Coordinated with stakeholders, handling product development, client collaboration, and evolving requirements.
- Maintained** codebase quality using **clean coding practices** and MVVM architecture, enabling fast iterations and reliable **app deployment** to App Store and Google Play.
- Mentored** interns and junior developers, fostering teamwork, adaptability, and problem-solving skills in a collaborative environment.

SKILLS SUMMARY

Programming Languages: Python, Java, Kotlin, Dart, JavaScript, HTML/CSS

Frameworks & Libraries: Flutter, Swift/UIKit, Django REST Framework (DRF), Node.js, Express.js, React.js, Next.js

Databases & Tools: Firebase, MongoDB, PostgreSQL, SQLite, SQL

DevOps & Deployment: AWS, Vercel, Docker, Google Play Store, Apple App Store

Development Tools: Git, GitHub, VS Code, Xcode, Android Studio, Postman, Figma, Adobe XD, Canva, Jira, Trello

Soft Skills: Team Mentorship, Time Management, Effective Communication, Dynamic Presentation

TwoRow Mobile App

[App Link](#)

- Integrated real-time notifications, increasing user engagement by 30% with Node.js, Express, and Firebase.
- Streamlined payment processing, cutting transaction times by 40% with efficient Stripe integration and automated workflows.
- Developed interactive location-based services, utilizing Google Maps, Firebase notifications, and geolocation features, boosting user satisfaction by 25% and improving store discovery, leading to a 20% increase in retention.
- Built scalable in-app purchases and live chat features using Socket.IO, enhancing communication with 99.9% uptime and driving a 35% rise in user engagement.

Containerized Malware Detection

[Link](#)

- Evaluated antivirus performance, testing the effectiveness of four popular solutions in detecting malware within Docker containers on various Linux distributions.
- Conducted payload generation using the Metasploit Framework, improving detection rates by 30% by analyzing antivirus responses.
- Developed a machine learning-based anomaly detection model, leveraging Python, Anaconda, and Scikit-learn's Isolation Forest, enhancing detection accuracy by 25%.
- Uncovered security gaps in containerized malware detection and proposed improvements that could potentially increase detection efficiency by 40%.

Smart Health Nepal Mobile App

[App Link](#)

- Integrated Esewa and Khalti for secure, localized in-app payments, delivering users a smooth and efficient payment experience.
- Developed an offline data storage system with SQLite, improving app reliability and reducing data loss incidents by 20% during network outages.
- Launched video calling and chat features, increasing user satisfaction and engagement by 3%.
- Optimized real-time interaction by utilizing geolocation tracking to continuously update and display user locations, enhancing the overall user experience.

Tanisi-Cree Keyboard

[App Link](#)

- Designed a custom iOS keyboard using Swift UIKit, enabling smooth conversion between English, French, and Syllabics.
- Integrated REST APIs for fast, efficient data transfer and real-time updates.
- Implemented tree node algorithms to efficiently compute and handle large datasets.
- Optimized native keyboard performance, ensuring low latency, smooth typing, and high responsiveness.
- Expanded accessibility for millions of users by deploying the app on the App Store.
- Maintained clean code architecture for scalability and easy updates.

Delivery Managemnet Applications | Packrs | Quick DMS

[App Link](#)

- Architected a QR code-based delivery management system and implemented background tracking to update driver locations in real-time, uplifting delivery personnel productivity by 25%
- Kept users informed about application updates/changes and community activities through advanced Firebase notifications and a custom notification system
- Established effective coordination with backend developers to incorporate RESTful APIs in Laravel for data exchange
- Programmed cutting-edge POS systems to streamline receipt generation processes, lowering client wait time by 15% and raising user satisfaction by 3%
